Information:

Can you read this? I couldn't believe that I could actually understand what I was reading. The phenomenal power of the human mind! According to research at Cambridge University, it doesn't matter in what order the letters in a word are, the only important thing is that the first and last letters be in the right place. The rest can be totally messed and you can still read it without problem. This is because the human mind doesn't read every letter by itself, but the word as a whole.
